

Abiodun Okusolubo

(+1) 346-414-9923 | ABBEY477@GMAIL.COM

PROFILE

IT professional with 15+ years of experience across the full software development lifecycle, spanning product, service-oriented, and enterprise application integration (EAI) environments. Proven track record delivering Java/Spring-based enterprise applications for major clients in banking and financial services, with hands-on experience in cloud deployment, CI/CD automation, and modern engineering practices.

PROFESSIONAL EXPERIENCE

JPMorgan Chase — Java Software Engineer III

September 2022 – Present

Full Time

- Design and develop enterprise Java applications using Spring Boot within an Agile delivery model, tracking sprint work via Jira.
- Leverage GitHub Copilot to accelerate development, boilerplate generation, and code review, improving delivery speed and consistency.
- Build and maintain CI/CD pipelines (Jenkins, AIM, Jules) to automate build, test, and deployment cycles.
- Run Polaris security scans and remediate vulnerabilities as part of a shift-left security practice.
- Automate operational jobs and batch processing using shell scripting and Autosys.
- Develop and optimize stored procedures for data processing and business logic execution at the database layer.
- Drive end-to-end (E2E) test automation across Java applications, sustaining 90%+ code coverage.
- Led data center migration of Java applications using AIM and Jules toolchains.
- Progressively upgraded legacy Java/Spring applications from JDK 8 through JDK 21, modernizing runtime performance and security posture.
- Leverage AWS cloud services to deploy, scale, and support enterprise applications, and containerize services using Docker, OpenShift, and Kubernetes for cloud-native deployment.
- Provide production support and maintenance for existing Java/Spring applications.
- Maintain technical documentation in Confluence and manage source control via Bitbucket.

Pinnacle Inc. — Java Software Engineer III

March 2022 – September 2022

Client: JPMorgan Chase

- Designed and developed enterprise Java applications using Spring Boot within an Agile delivery model, tracking sprint work via Jira.
- Leveraged GitHub Copilot to accelerate development, boilerplate generation, and code review, improving delivery speed and consistency.
- Built CI/CD automation pipelines using AIM, Jules, and Jenkins.
- Identified and resolved security vulnerabilities through routine scanning.
- Automated job scheduling with shell scripting and Autosys.
- Developed and optimized stored procedures for data processing and business logic execution at the database layer.
- Executed E2E testing across the application suite, maintaining 90%+ test coverage.
- Supported data center migration efforts for Java applications.
- Modernized applications by upgrading from JDK 8 through JDK 21.
- Leveraged AWS cloud services to deploy, scale, and support enterprise applications, and containerized services using Docker, OpenShift, and Kubernetes for cloud-native deployment.
- Provided ongoing support for production Java/Spring applications, with documentation in Confluence and source control in Bitbucket.

Softworld Inc. — Senior Software Engineer

September 2019 – February 2022

Client: USAA

- Applied automated functional testing practices to service-layer components.
- Remediated security vulnerabilities identified through Polaris security scans and helped integrate the tool across multiple services.
- Enhanced custom in-house applications to meet evolving business requirements, building deep expertise in the internal framework and system architecture.
- Mentored junior developers through peer programming and knowledge-sharing sessions.
- Built automation tooling to streamline recurring operational processes.
- Authored deployment runbooks and process documentation for production releases.
- Managed sprint work via Jira and performed unit testing with JUnit.
- Partnered closely with business stakeholders and product owners to translate requirements into technical solutions.
- Participated in daily standups, backlog refinement, and biweekly sprint reviews within an Agile/Scrum team.

Zhill Systems — Senior Software Developer

August 2019 – December 2019

- Evaluated and selected technologies for new software product development.
- Mentored and upskilled junior developers on modern Java engineering practices.
- Designed the ER diagram and full technical specification (use cases, class diagrams, sequence diagrams, activity diagrams) for an online banking web application.
- Defined the high-level architecture and implemented the domain model, controllers, services, and DAO layers.
- Built REST APIs with Spring Framework and Spring Boot following an MVC architecture.
- Structured and managed the project build using Maven and Gradle.
- Developed the client-side experience in React, including form validation and error handling; styled the UI with Bootstrap and Thymeleaf.
- Built a Selenium-based UI regression test framework alongside JUnit-based unit test automation.
- Implemented data persistence with Hibernate (POJOs, configuration, and mapping files).
- Owned full SDLC delivery — analysis, design, development, and testing.
- Developed the presentation layer using React, XHTML, HTML5, JavaScript, AJAX, and CSS.
- Configured Spring Boot microservices and deployed solutions to AWS via Docker Compose.

CWG PLC — Software Developer/Engineer

April 2007 – January 2018

Clients: UBA Bank, FBN Bank, Fidelity Bank, Skye Bank

Automated Charge Collection Solution

- Built a high-throughput charge collection system processing millions of bank transactions within tight SLA windows via automated debit/credit transfers between customer and bank accounts.
- Implemented account holds for insufficient-balance scenarios, with funds retrieved automatically once available.
- Achieved horizontal scalability using Apache ActiveMQ for message-driven processing.
- Designed flexible, bank-specific transaction routing using Apache Camel and Enterprise Integration Patterns (EIP).
- Migrated logging from flat files to the ELK stack to manage high-volume log data at scale.
- Engineered stateful recovery so the system automatically restored itself after abrupt server failure, critical for uninterrupted financial transaction processing.
- Built the solution on Java, JSF, Spring Boot, Camel, and ActiveMQ, backed by Oracle DB and deployed on AIX, running multiple concurrent instances to scale with data growth.
- Secured the application and implemented user authentication using Spring Security.

Bills Presentment Solution

- Built a microservices-based bills presentment platform using Spring Boot.
- Gained hands-on experience with early Spring Cloud components — Eureka, Zuul, Feign, Ribbon, and Hystrix — for service discovery, routing, and fault tolerance.
- Implemented SSO-based authentication and authorization.

Actimize Anti-Fraud Deployment & Integration

- Deployed an anti-fraud solution to secure card transactions across the bank's channels.
- Integrated Finacle (core banking) with Actimize to secure all ATM and web card transaction traffic.
- Built a SOAP web service client in shell script and Finacle scripting to meet strict ATM latency SLAs.

College-Net School Portal

- Built a college management portal on the JBoss Jetspeed portal container, backed by a MySQL RDBMS.
- Designed ER diagrams using Toad Data Modeler.
- Implemented the data access layer with Hibernate/JPA and the UI with JSF (PrimeFaces).

Finacle-SWIFT Integration System

- Built an integration ensuring SWIFT-generated messages were reliably delivered to the core banking application (CBA).
- Used Apache Camel as the routing engine, with checksum validation to confirm complete message delivery.

Third-Party Insurance System (3PI)

- Delivered a statewide vehicle insurance integration platform for Kano State Government, Nigeria.
- Built a single platform connecting insurance companies with participating banks.
- Eliminated fraudulent/fake vehicle insurance across the state through unified verification.

Finnone Loan Integrator

- Built an integration connecting Finnone Loan Origination to Finacle Core Banking for automated loan payment collection.
- Implemented LIEN placement on accounts with insufficient balance.
- Built continuous retry logic to ensure payments were collected once funds became available.

Entrust Multi-Factor Solution Integration

- Built an Entrust multi-factor authentication integration using JAX-WS and Spring-WS.

Twenty4Help Knowledge Service — Software Support Engineer

May 2003 – December 2006

Clients: Sony Ericsson (mobile handsets), HP (Hewlett Packard products)

- Delivered technical support for the full Sony Ericsson handset lineup, including WLAN, USB, Infrared, and Bluetooth connectivity issues.
- Provided technical support for HP printers and laptops, covering wired/wireless and networked/non-networked installations.
- Diagnosed and resolved printer hardware and connectivity faults.

EDUCATION

Master of Science (MSc), Computer Programming

Northumbria University, Newcastle Upon Tyne, United Kingdom

Bachelor of Engineering (BEng), Agricultural Engineering

University of Ilorin

PROFESSIONAL CERTIFICATIONS

- Sun Certified Java Programmer (SCJP)
- Sun Certified Web Component Developer (SCWCD)

DEVELOPMENT TOOLS, LANGUAGES AND METHODOLOGIES

Languages/Scripting: Java (8–21), HTML5, CSS3, JavaScript, Shell Scripting

Frameworks: Spring Boot, Spring Cloud, J2EE/JEE, JSF, PrimeFaces, ReactJS, Bootstrap, Thymeleaf

Database/Data: Oracle (11g/12c), MySQL, PostgreSQL, MariaDB, DB2, MongoDB

Cloud & Containers: AWS, GCP, Docker, Docker Compose, Kubernetes, OpenShift, Spring Cloud

Integration: ActiveMQ, Apache Camel, Apache Kafka, Spring Integration, Spring Batch, ESB

CI/CD & Tools: Git, GitLab, GitHub, Bitbucket, Jenkins CI/CD, Maven, Gradle, Jira, Mockito, GitHub Copilot

Testing: Selenium, TestNG, JUnit, REST Assured, Spring Boot Test

Platforms/IDEs: Eclipse, IntelliJ, JBoss, Tomcat, VS Code, Sublime Text, Notepad++

Operating Systems: Windows, Linux, Unix, Windows Server 2016

Applications: Microsoft Office 365, Adobe Photoshop, Adobe Dreamweaver, draw.io, Visio

Methodology: Agile, Waterfall
